

A STATISTICS COURSE OR EQUIVALENT MUST COVER THE FOLLOWING CONTENT

- Measures of central tendency and dispersion (*i.e.*, mean, median, standard deviation, etc.)
- Normal distribution
- Comparing two (2) groups (*i.e.*, the t-test)
- Simple regression and correlation
- Analysis of repeated observations (*i.e.*, paired t-test, repeated measures ANOVA)

Non-essential but encouraged topics are:

- Comparing more than two (2) groups (ANOVA)
- Exposure to non-parametric stats (analysis of ranked and ordinal data)
